

PDFVault.ai — End-to-End User Flow

20 July 2026

SUMMARY

This document maps the end-to-end user journey for PDFVault.ai, from the moment a visitor lands on the site to the moment they check out with a paid, downloaded file. It is shared for review and sign-off before we move into UAT & launch..

USER PERSONAS

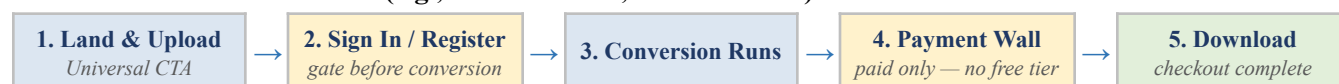

Our users are everyday people with a simple, one-off document need:

- A student (e.g., a Grade 4–5 kid) who needs a homework file as a PDF
- An AI/ML researcher handling papers, datasets, and reference docs
- An enterprise/office worker processing business documents
- A tax or finance professional working with forms and statements
- Anyone who wants to quickly convert or edit a PDF file

USER FLOW

Every journey starts the same way: the user lands on the homepage and sees one universal upload CTA — no separate tools or menus to choose first. From there, the path splits by intent:

User Flow 1 — Convert a file (e.g., Word → PDF, PDF → Excel)

User Flow 2 — Edit / compose a PDF (PDF Composer)

PRICING PLAN

- 7-day trial — \$0.99
- Monthly subscription — \$24.99
- Retention approach modeled on PDF Guru (trial auto-converts to subscription), we'll ease terms later if we see user resistance.
