Functional Bugs / Suggestions

PDF Editor - Save PDF Edited Version - Bug

Description: When the user performs edits in PDF and save changes, the application fails to save changes correctly.

Steps to Reproduce

1. Launch Application
2. Upload PDF
3. Make following edits:
 - a. Add Whiteout
 - b. Add Signature
 - c. Add Watermark
4. Click Save -> Save as PDF

Actual Result

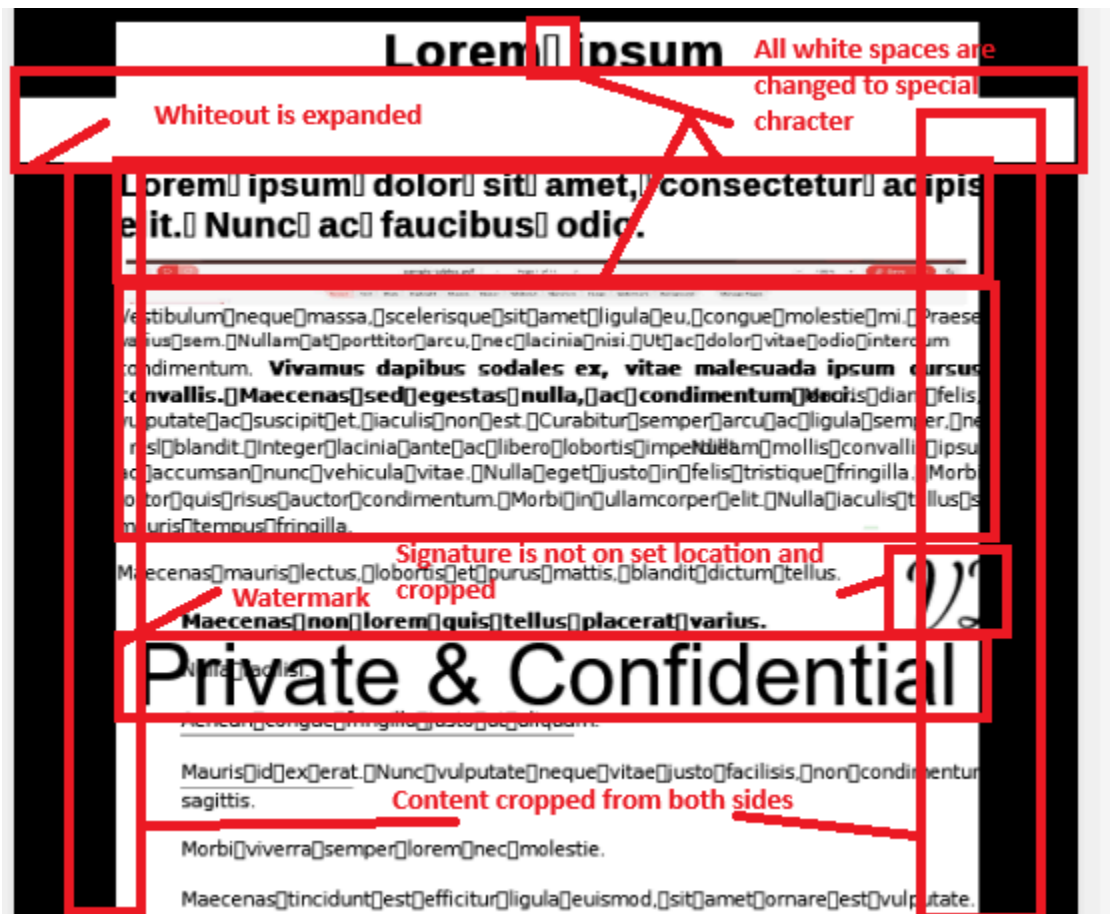

Application failed to save the changes correctly.

Expected Result

Application should save changes correctly.

PDF Editor - Open PDF Edited Version - Bug

Description: When the user opened the edited PDF, the application failed to open the saved version correctly.

Steps to Reproduce

1. Launch Application
2. Upload Saved PDF

Actual Result

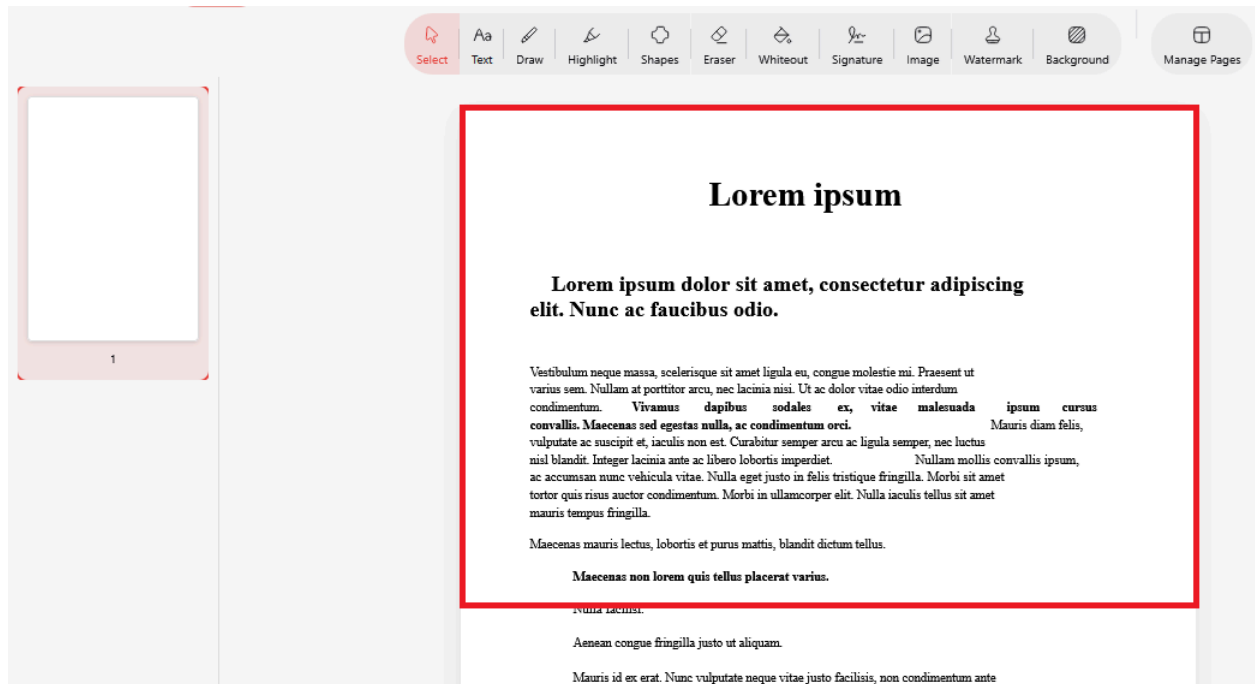

Application failed to open saved PDF correctly.

Expected Result

Application should open saved PDF as expected.

PDF Editor - Create New - Bug

Description: Create New failed to show blank page

Steps to Reproduce

1. Launch Application
2. Upload PDF
3. Click hamburger icon
4. Click menu option "+ Create New"
5. Application will show a popup "Create new PDF document"
6. Select desired options and click "Create"

Actual Result

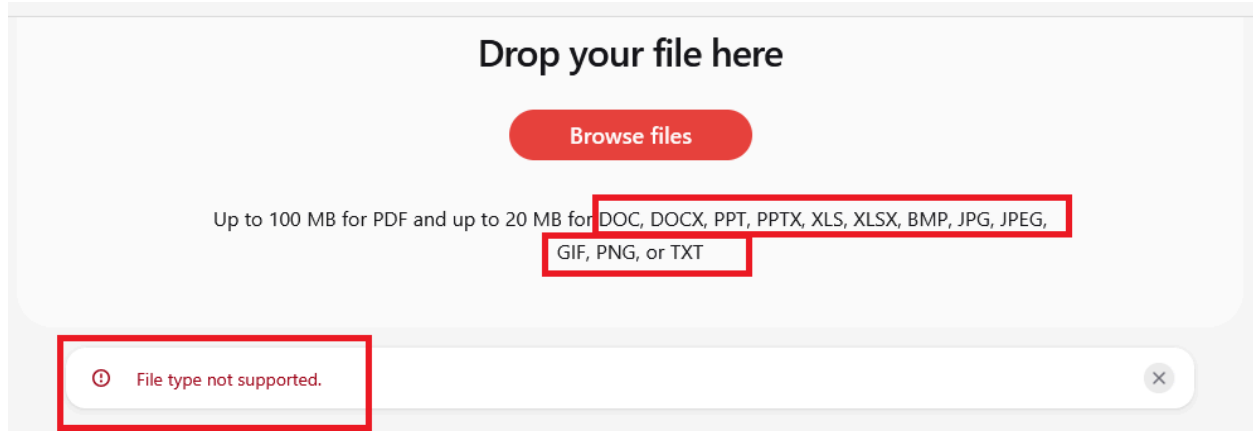

The application will show the first page of a previously opened document as the first page of a new document and fail to show a blank page.

Expected Result

The application should show a blank page.

PDF Editor - Drop your file here / Upload files - Bug

Description: Application failed to upload following file types DOC, DOCX, PPT, PPTX, XLS, XLSX, BMP, JPG, JPEG, GIF, PNG, or TXT.

Steps to Reproduce

1. Launch Application
2. Upload file types DOC, DOCX, PPT, PPTX, XLS, XLSX, BMP, JPG, JPEG, GIF, PNG, or TXT.

Actual Result

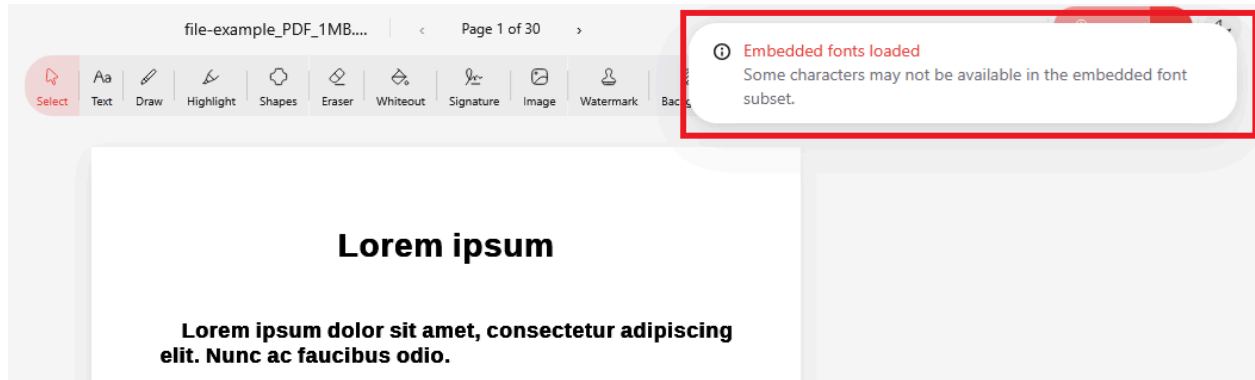

Application failed to upload following file types DOC, DOCX, PPT, PPTX, XLS, XLSX, BMP, JPG, JPEG, GIF, PNG, or TXT.

Expected Result

The application should be able to upload all mentioned file types PDF, DOC, DOCX, PPT, PPTX, XLS, XLSX, BMP, JPG, JPEG, GIF, PNG, or TXT.

PDF Editor - Embedded fonts loaded - Bug

Description: Application is showing a popup which shows “Some characters may not be available in the embedded fonts subset.”.

Steps to Reproduce

1. Launch Application
2. Upload PDF file (which may have some characters which are not available in embedded font subset)

Actual Result

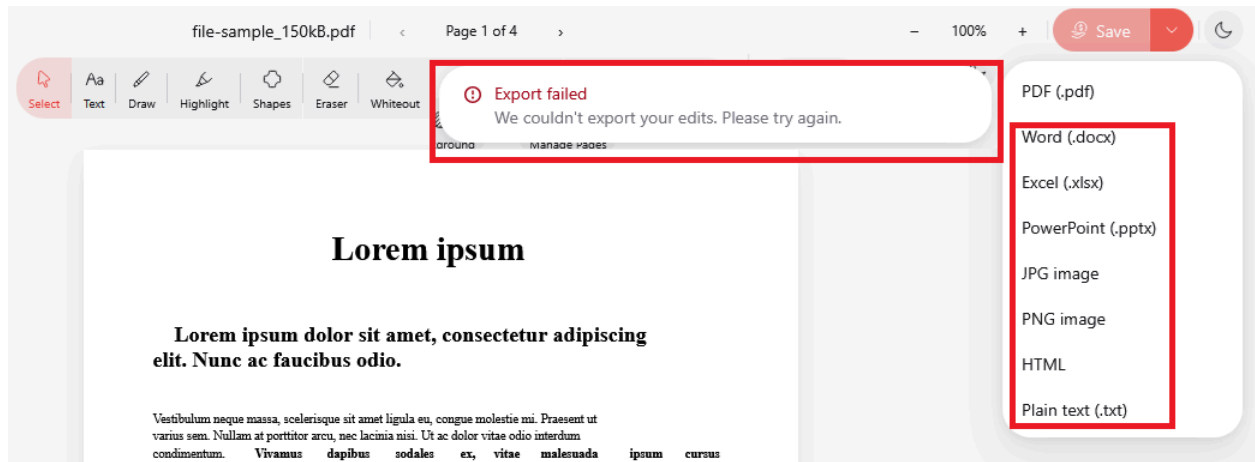

Application failed to load characters which are not available in embedded font subset.

Expected Result

The application should load all characters successfully.

PDF Editor - PDF Export Failed - Bug

Description: Application failed to export PDF to Word (.docx), Excel (.xlsx), PowerPoint (.pptx), JPG image, PNG image, HTML, or Plain text (.txt).

Steps to Reproduce

1. Launch Application
2. Upload PDF file
3. Click down arrow icon next to "Save"
4. Click any of the following Word (.docx), Excel (.xlsx), PowerPoint (.pptx), JPG image, PNG image, HTML, or Plain text (.txt)

Actual Result

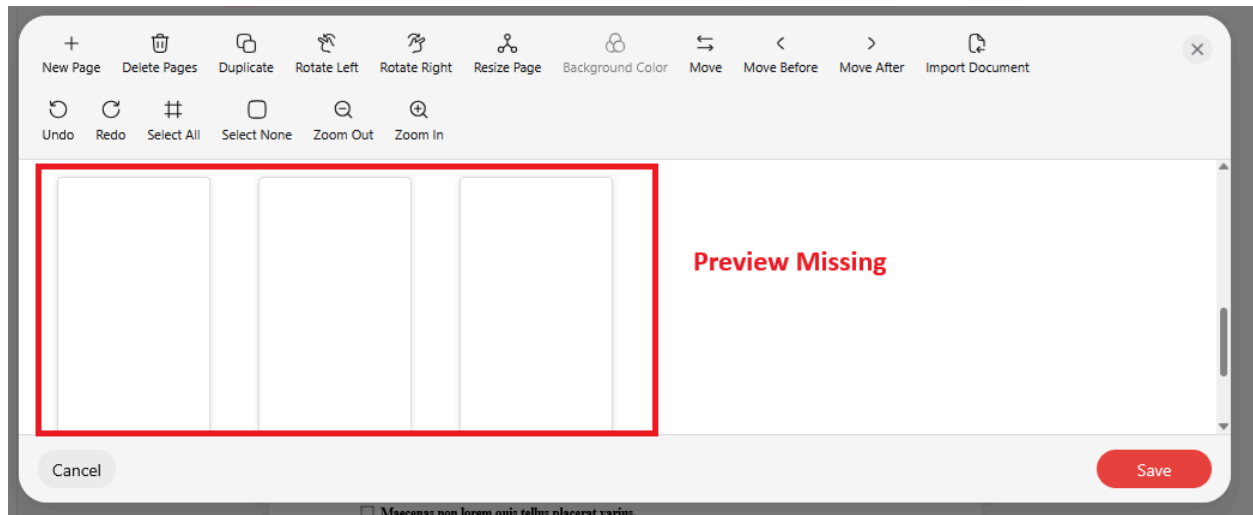

Application failed to export PDF file to desired file type.

Expected Result

Application should export PDF file to desired file type.

PDF Editor - Manage Pages - Import Document - Bug

Description: Application failed to show the preview of the imported document page(s).

Steps to Reproduce

1. Launch Application
2. Upload PDF
3. Click "Manage Pages"
4. Click "Import Document"
5. Select desired document and Click "Open"
6. Observe the preview of imported document(s)

Actual Result

Application failed to show a preview of imported document page(s).

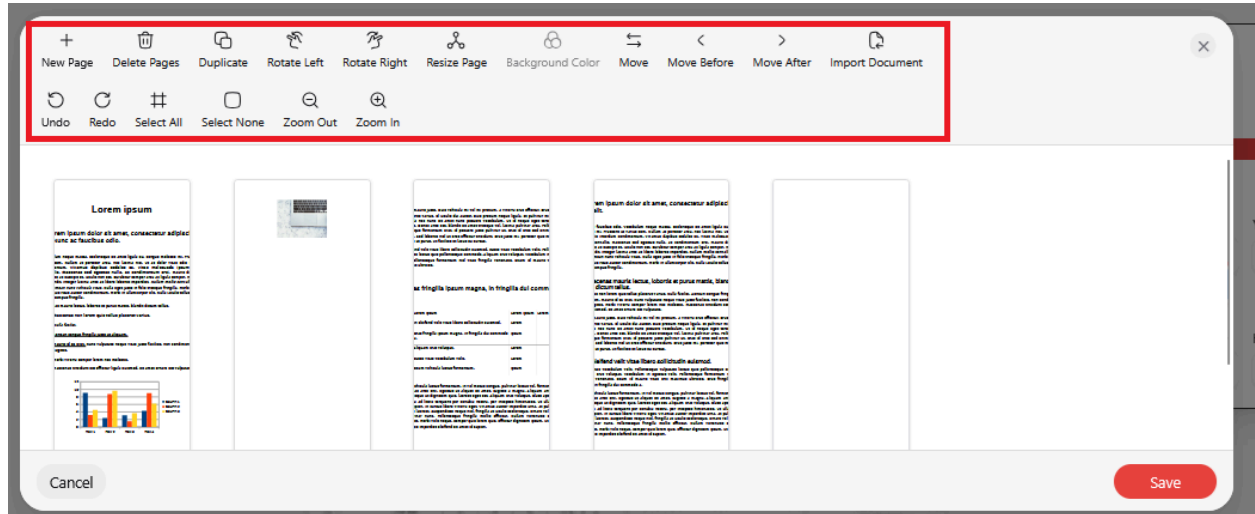

Expected Result

The application should show the preview of all page(s).

UI / UX Bugs / Suggestions

PDF Editor - Manage Pages - Active Icons - Bug

Description: Manage Pages - When a user rollover any active icon application fails to change the pointer icon to hand icon.

Steps to Reproduce

1. Launch Application
2. Upload PDF
3. Click "Manage Pages"
4. Rollover active icon(s)

Actual Result

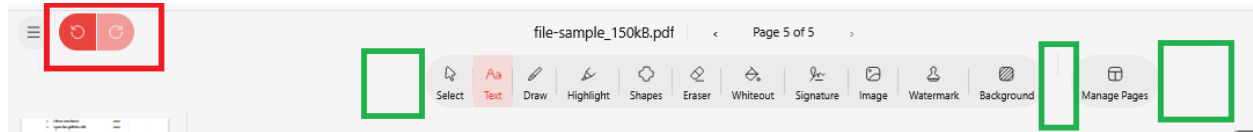

When rollover any active icon application shows a pointer icon.

Expected Result

When rollover any active icon application should show a hand icon.

PDF Editor - Reposition Undo and Redo Icons - Suggestion

Description: Undo and Redo icons on PDF Editor page are out of site.

Steps to Reproduce

1. Launch Application
2. Upload PDF
3. Observe the Undo, and Redo icons' position

Actual Result

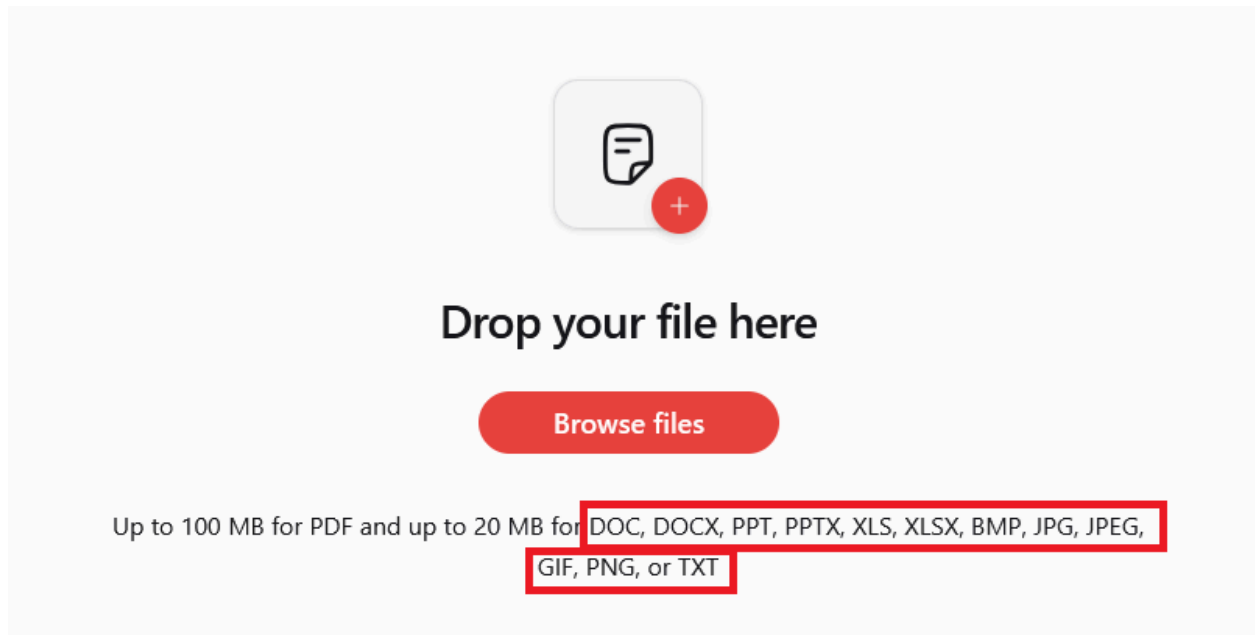

Undo and Redo icons are out of site and not user friendly.

Expected Result

Make Undo and Redo icons a part of icon bar, location may be before "Select" icon, before or after "Manage Pages" icon. Please ask the designer for a better position.

PDF Editor - Message for upload file types - Suggestion

Description: The message for file types look odd.

Suggestion: Kindly replace the existing message with “Up to 100 MB for PDF and up to 20 MB for “Word (.doc, .docx), Excel (.xls, .xlsx), PowerPoint (.ppt, .pptx), Image (.gif, .jpg, .jpeg, .png), HTML, or Plain Text (.txt)”.

PDF Editor - Website - Everything you need for PDF, tabs (Edit PDF, Convert from PDF, and Convert to PDF) - Suggestion

Description: When a user rollover any of the sub-section of tabs (Edit PDF, Convert from PDF, and Convert to PDF), the sub-section expands to show a description which has a flicker.

Steps to Reproduce

1. Launch Application
2. Scroll down to section "Everything you need for PDF"
3. Click tab Edit PDF, Convert from PDF, or Convert to PDF
4. Rollover any of the available sub-section

Actual Result

When a user rollover any of the sub-section it expands to show a description and has a flicker.

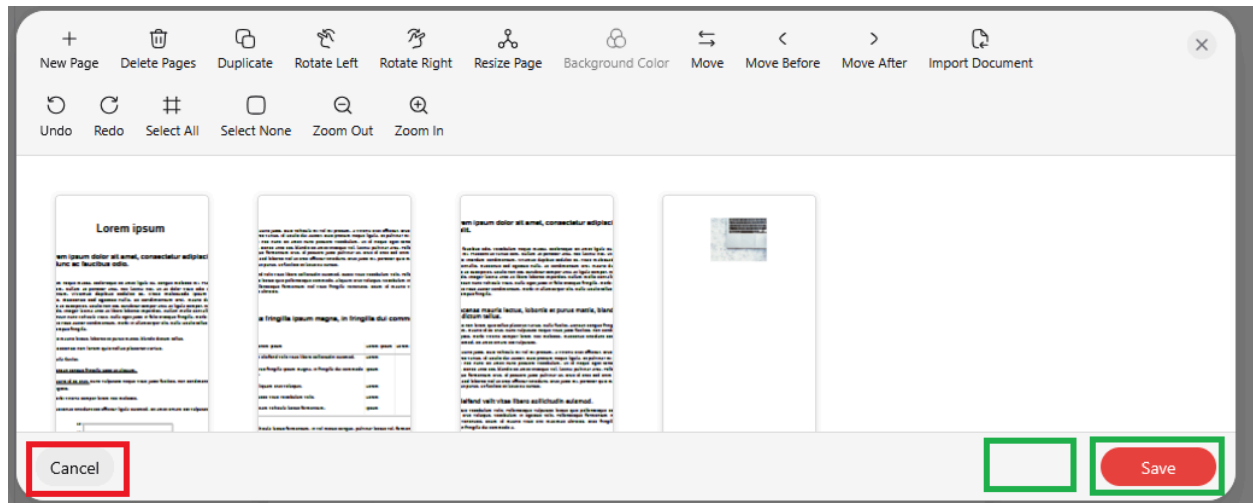

Expected Result

When a user rollover any of the sub-section, when it expands there should be no flicker.

Possible Solution

Increase the default height of the sub-section which accommodates the description.

PDF Editor - Manage Pages - Place the “Cancel” button before the “Save” button - Suggestion
Description: Placement of “Cancel” is out of sight, place the “Cancel” button before the “Save” button.

Steps to Reproduce

1. Launch Application
2. Upload PDF
3. Click “Manage Pages”
4. Observe the placement of “Cancel” button

Actual Result

“Cancel” button is out of sight.

Expected Result

Place the “Cancel” button before the “Save” button.
